

Supplies

- 12" x 12" Unfinished Frame
- 12" x 12" Sheet Metal*
- 12" x 12" Calendar Transparency
- Assorted Papers & Embellishments
- Clipart (see page 2)
- i-top Brad Maker Tool #001309
- Large Magnet Daddies #002180
- Paint
- Diamond Glaze, Judikins

This project
features the
new i-top
magnet
daddies.

Instructions

1. Paint wood part of frame any color acrylic you desire.
2. Place "Calendar Transparency" behind glass.
3. Place "Sheet Metal" behind transparency, glass and close back of frame. ***NOTE:** If you're not sure where to purchase sheet metal from, most heating/cooling shops will cut metal to size for a very minimal cost.
4. Punch the clipart (page 2) using the large i-top punch.
5. Use i-top tool and large magnet daddies to create calendar magnets. To learn how to use the i-top tool, visit our website to watch how-to videos on the tool and more fun projects.
6. Once you've created your magnets, coat them with a thin layer of Diamond Glaze by Judikins. It protects the clipart and also makes them shiny.
7. Finish off your calendar by either printing monthly headers on transparency sheets or create them from your favorite Imaginisce scrapbook products (like the samples shown).

For more samples using the i-top and accessories, visit imaginisce.com to view all the coordinating products.
