- #8 shader
- Brush Basin
- Palette Paper
- Paper Towels
- Cosmetic Wedge Sponges
- Foam Plates
- Sea Sponge
- Decorative Ribbon (if desired)
- Wooden Tags (if desired)

INSTRUCTIONS

Please take a moment to review the instructions on all product packaging before
beginning any project.

1. Wash and dry glass well.
2. Apply surface conditioner according to instructions on label.
3. Basecoat jars with citrus yellow.
4. When dry, use a sea-sponge to apply Ultra White. Use plenty of paint and use pressure when pouncing. When dry, go back 1-2 times more to add a more dimensional finish.

5. Position stencil as desired. TIP- you may need to use scissors to separate the stencil design in order for them to fit nicely on your surface.
6. Pounce over stencil lightly with Red/Red or Mediterranean Blue according to photograph.
7. TIP- after dipping foam wedge into paint, try to remove as much as possible on paper towel before applying to projects. If darker color is desired, repeat.
8. Dip your fingertip into paint and run your finger lightly around edge of glass and raised areas, or use painters tape to create a stripe around the glass jar. Pounce with desired color.
9. Finish off with ribbon and tags.
