Instructions:

Stitch your star on the perforated paper Trinkets™ shape following the color key below. We recommend starting with the metallic areas first, then do the background in the silk color. Use two strands of Silk Mori for a full effect, or use one strand for a lighter look. TIP: the holes on the paper are small and thus require a smaller needle. To thread your #28 Tapestry needle with Very Fine #4 Braid, use a needle threader — it makes life easy! Or switch to a different needle type (such as a crewel needle) that can accommodate the Braid but still fit easily through the paper holes. Watch your tension as you stitch, so you don't tear the paper.
