Letter from the Editors

Dear Reader,

We are excited to present our latest craft eBook with 30 craft projects for Thanksgiving, including Paper Crafts, Decorations, Table Accents and Thanksgiving Crafts for kids. Welcome family and friends to a Thanksgiving feast at your home with homemade decorations and table accents. Themes include turkeys, pilgrims, pumpkins, leaves and warm autumn colors. Find just the right project to make your house warm and inviting this Thanksgiving.

Thanksgiving is a special holiday during which we Americans gather with our loved ones, share a feast and most importantly, remember the good things in our lives. Thanksgiving reminds us to be thankful for these good things, value others and to share what we can, just as the Native American did with the Pilgrims at the first Thanksgiving feast. With such a wonderful message, let’s honor Thanksgiving with the same excitement as the other end-of-year holidays.

You can find more free Thanksgiving crafts and other upcoming holiday crafts at www.FaveCrafts.com.

Our eBooks, like all our craft projects, are absolutely FREE to members of our crafting community. Please feel free to share with family and friends and ask them to sign up at our website for our free e-mail newsletter.

Sincerely,

The Editors of FaveCrafts

Happy Thanksgiving Woodburned Plaque

By: Chris Wallace for Walnut Hollow

Decorate for Thanksgiving with this beautiful wood-burning project featuring a harvest wreath. A stamp helps creates the wreath which is then wood-burned and colored with oil pencils. You can use any Thanksgiving stamp you like for this project.

Instructions:

1. To prepare wood for stamping and woodburning, use sandpaper to lightly sand wood surface to a smooth finish.

2. Use ink stamp pad to apply ink to rubber stamps. Press onto center of plaque and lift. Refer to picture for placement suggestions.

3. Before using Creative Woodburner® Detailer, read directions and follow all safety precautions. Attach Mini-Flow Point to tool. Tighten with pliers. Use tape to secure stand to hard surface. Place tool on stand. Plug into electric outlet and let heat for 4-5 minutes. Practice on a scrap of wood before beginning project.

4. Use Mini-Flow Point to burn all the lines of the stamped image. Do not press hard. Let the point glide over the wood. For darker woodburning, move slowly and woodburn the lines more than once. When woodburning is complete, unplug tool and let cool.

5. Use eraser to remove any smudge marks.

6. Use Oil Colored Pencils to add color to woodburned images. Use Q-tip or blending stick to blend colors.

7. Apply 2-3 coats of spray varnish for a protective finish.

Materials:

- Walnut Hollow® #24414 Creative Woodburner® Detailer
- Walnut Hollow® #3500 Basswood Country Planks, Small
- Walnut Hollow® #9912 Oil Colored Pencils, 12 Color Set
- PSX Rubber Stamp #K-1541
- PSX Rubber Stamp #G-1367 (or use rubber stamps of your choice)

Continued on Next Page
3. Glue cones to foam block as shown. For added strength, glue and insert a wooden pick through block into widest part of each paper-covered cone.

4. Twist chenille stem ends together, forming hanging loop. Glue and insert loop into top back of block; secure with floral pins. Note: Hang swag before adding fillers in order to achieve proper balance in finished piece.

5. Using photo as guide, glue and insert pear and pomegranates into top of center cone. Insert grapes, then sunflowers, into remaining cones. Fill in spaces with fall leaves. Insert berries into right cone so they cascade down side. Insert one berry spray vertically into right cone. Insert feathers in left cone. Insert dried grain stems into center cone. Wall Art Fall Wreath

by Cheri Wenger for GlueArts.com

Here is a fun decorative fall wreath project that scrapbook enthusiasts who love patterned papers and cardstocks will love.

Materials:

- Adhesive: Glue Arts™ Wall Art Décor Adhesive (12” x 12 sheets “)
- Cardstock: (Deja Views) Global Views Double Sided Paper Pack (available at Michael’s)
- Cutters: (QuicKutz®) Silhouette™ Digital Craft Cutter; (Fiskars) Paper Trimmer and (Xacto) cutting knife

Instructions:

1. This first step assumes that you have installed and launched the ROBO Master software provided with your Silhouette digital craft cutter. Choose the leaf 0026 graphic from the pattern library. Cut and paste into a new letter size document, name and save the file. Now, you can begin to layout your document. Stretch and scale the leaf to make varied sizes and widths. You can also flop the direction to make it face the opposite way. Next, open the flourish 0009 file, cut & paste design, ungroup elements and scale choices to desired sizes and directions. Create ½” – ¼” circles in empty spaces. Position these on page to fit multiple designs on one page. Save final file.

2. Trim cardstock to 8-1/2” x 12”. You will need about 4-5 different sheets of coordinating colors and patterns. Apply the first sheet to a sheet of Wall Art adhesive making sure that the side you want to show is face up. If you are adhering to something reflective or clear, you will need to make sure that the colors and patterns on the back side of your papers coordinate.

3. Use your paper trimmer to trim excess Wall art adhesive and carrier sheet away from patterned cardstock. Do not remove white top sheet yet. Flip over and rub back side to transfer adhesive to the cardstock. Now turn over and remove top white sheet and place the cardstock with clear carrier sheet face down onto the Silhouette cutting pad and rub to make sure it is attached and that there are no bumps.

Continued on Next Page
4. You will need to insert and align the carrier sheet with your patterned cardstock into the Silhouette per the directions provided with the software.

5. Choose FILE > CRAFT ROBO... from pull down menu to cut out the graphics. Next, select Cardstock 40-60lb from the pull down menu in the pop up window. (If you are using heavier cardstock, you will need to change out this setting and the recommended cutting blade). Once all your settings are done, choose cut. When finished cutting use left hand wheel on the Silhouette to remove the carrier sheet with patterned paper.

6. Leave patterned cardstock on carrier sheet. Using the point of a cutting blade, remove each digital graphic. Make sure the clear adhesive carrier sheet is not still attached to the back side or it will not stick. Start randomly placing leaves and swirls onto wall in a rough circular shape. See below.

7. Repeat steps 2-6, applying each sheet of patterned graphics to the wall, one sheet at a time. You will be able to rearrange images as you work, but caution not to do this too often, or your graphics may no longer want to stick. You will want to make sure that your wreath doesn’t have any obvious holes or gaps and that the colors are well balanced.

An Additional Side Project Created from Left Overs: Fall Candle Holder

While I was working on the wreath project, I decorated a glass candle holder with some of the remaining diecut graphics. This is a very fun project because you can enjoy both sides of the patterned papers. Keep this idea in mind while you are working on your wreath. You can use some of the graphic elements to decorate a vase, candle holder or glass bowl.

**Pumpkin Patch Garland**

By: Kathleen George for STYROFOAM Brand Foam

Bring a little bit of autumn's color into your home all year round with this cheery orange pumpkin patch garland. Show it off on your front door, wind it around your banister, display it on your fireplace mantel, or even hang it in a window.

**Steps:**

1. Press each foam ball firmly on a flat work surface to flatten bottom.

2. Mark center top and bottom of each ball. Refer to diagram to divide each ball into six equal sections by placing three rubber bands around the foam, crisscrossing them at top and bottom. Mark sections with a fine-line marker.

3. Using a craft knife, cut a V-shape groove approximately 3/8"-1/2" deep at each mark, forming pumpkin ridges. Rub cut edges of foam with a pencil to smooth.

4. Neatly wrap orange tissue paper around a foam pumpkin to cover, bringing edges of paper to center top. Tightly wrap masking tape around excess paper at top to create a stem and then trim stem at an angle. Press tissue paper into ridges with your fingers for added definition. Repeat for each pumpkin.

5. Wrap pumpkin stems with dark green floral tape. Glue and insert a 6" wire into foam next to each stem. Curl wires around stems for vines, letting them extend at top.

6. Bend an 18"-24" length of wire in half. Twist wires together two times 3" from center to form a hanging loop for garland.

**Materials:**

- STYROFOAM™ Brand Products:
  - Balls, assorted 2-1/2", 3", and 4"
- Craft knife with sharp blade
- Tape measure
- Rubber bands
- Orange tissue paper
- Olive green twisted paper ribbon
- Dark green floral tape
- Light green floral tape
- Masking tape
- Green floral wire
- Pencil
- Fine-line black marker

**Steps:**

1. Press each foam ball firmly on a flat work surface to flatten bottom.

2. Mark center top and bottom of each ball. Refer to diagram to divide each ball into six equal sections by placing three rubber bands around the foam, crisscrossing them at top and bottom. Mark sections with a fine-line marker.

3. Using a craft knife, cut a V-shape groove approximately 3/8"-1/2" deep at each mark, forming pumpkin ridges. Rub cut edges of foam with a pencil to smooth.

7. Overlap another wire onto ends of wire loop and wrap with light green tape to begin forming garland. Continue wrapping with tape approximately 8" or to end of overlapping wires.

8. Attach pumpkin to garland by wrapping vine around wire (refer to photo). Wrap top of vine around your finger or a pencil to curl. Wrap tape around garland where pumpkin is joined for reinforcement.

9. Continue wrapping wire garland with tape, adding pumpkins evenly spaced. Extend garland with additional lengths of wire as needed.

10. Follow Step 6 to add a wire hanging loop to opposite end of garland.

11. Untwist and flatten paper ribbon. Using pattern, cut desired number of leaves from paper ribbon. Add leaves individually and in clusters to garland by wrapping short lengths of floral tape around their base.
