

If you're gearing up for a big tie dye party, then be sure to check out this awesome tutorial from our friends at iLovetoCreate before you begin.

With the right supplies, you can start and finish an entire tie dye project in just six easy steps. It's always a good idea to take a few extra minutes to properly setup your work station before beginning; this will make the clean-up process much easier and efficient!

- Cover table with plastic table cover
- Place dye bottles, a bucket, a roll of paper towels and sealable plastic bags at each tie-dye station
- Use plastic buckets to contain dye and make cleanup easy
- Place 2 sheets of paper towels in each bucket to absorb excess tie-dye
- Put wet tie-dye projects into sealable plastic bags
- Toss used paper towels in trash after each tie-dye project
