

Tie Dye Winter Gloves

by Frances Seda for favecrafts.com

MATERIALS

- Accessories to tie-dye
 - Permanent markers in array of colors
 - Rubbing alcohol
 - Eye dropper
 - Cookie Sheet
 - Aluminum foil
 - Plastic wrap
-

INSTRUCTIONS

1. Draw a pattern on the gloves using permanent marker. I decided to only draw on one side of the gloves.

2. Before applying the alcohol, place a piece of plastic wrap inside of the glove to prevent the colors from bleeding too much onto the palm side of the gloves.
3. Apply the alcohol onto the gloves using a dropper. It's not too long before the tie-dye effect is visible.

4. I also tried a rainbow effect as well...

5. And while the color did bleed a little onto the palm side of the gloves, it wasn't terrible. For something really unique you could make a set of winter accessories – hat, scarf and gloves - in tie-dye.

To Finish All Items:

Let your items dry completely in a well-ventilated area and then place them in the dryer on high heat for 20 minutes so that the color can set. And do not fear, your items will not smell of alcohol or permanent marker once you are done, but I would suggest washing and drying the items before using them.
