CHALKY FINISH
ultra-matte paint

Letter from Stan Clifford, DecoArt's CEO and President

I want to invite you to learn more about the newest member of the DecoArt product family, Americana Decor Chalky Finish Ultra-Matte Paint. We took more than a year to carefully formulate Chalky Finish paint to offer you the highest possible quality chalk paint available.

We know there are many paints available in the store for you to choose from for finishing furniture pieces or decorative items. So why choose Americana Décor Chalky Finish Paints? Because they are the easiest product to use to achieve a distressed, shabby chic look with any flea market find or even newly bought discount store items. Creating that beautiful, vintage European look doesn't take a lot of special skills or hours of training. By the time you finish reading this eBook, you will be the flea market find refurbishing expert in your neighborhood, and visitors to your home will want to know where you curated all of your unique pieces.

THE PAINTS

Americana Decor Chalky Finish Paints are specially formulated to provide excellent adhesion to wood, metal, laminate, decorative glass, terra cotta, ceramics, and more. There's no need to prep the surface with time-consuming stripping or sanding...you just clean it and go!

- No prep: No priming or prep needed (Unless the surface has an old finish that may bleed when painted; then Stain Blocker should be used before painting.)
- Excellent coverage: One-coat coverage with most colors and on most surfaces
- Very matte, chalky finish
- Durable: Due to the unique cross-linking feature of the paint resin system
- Easily distresses for a vintage appearance
- Can be buffed to a smooth, shiny finish
- Water-based for easy clean-up

Besides the paint, available in 29 intermixable colors, the line also includes waxes, varnishes, brushes, stencils, stain blocker, as well as image transfer and crackle mediums.

Thank you for taking the time to learn more about our Americana Decor Chalky Finish products. We hope the projects in this eBook will inspire you. We would love to see what you create. Share your pictures with us by tagging us through our social media channels or emailing us.

Why Use Chalky Finish?

Get the trendy, ultra-matte look and easily refurbish flea market finds with Americana Decor® Chalky Finish paint. From boho to shabby chic cottage to contemporary, Americana Decor® Chalky Finish is versatile enough to achieve all looks. Layer paints, tint waxes, and more to customize a piece that would have otherwise been headed to the curb. It is also easy to use. No prep is needed, and the paint flows on almost any surface with excellent coverage, distresses easily, and produces-professional looking results every time.

Chalky Finish in 3 Simple Steps

STEP 1 - **PREP:**

1. Thoroughly clean the project's surface.
2. **Is it a flea market find or an older piece?**
You never really know what might be hidden on the surface of the piece. There are many different stains and oils that may have been applied or naturally accumulated on the surface over the years (such as kitchen grease on cabinets or tables). In addition, some surfaces may have finishes that have worn away or contain deep scratches, which may expose old stains or natural tannins found in many types of wood. These unforeseen surface conditions can interfere with the performance and appearance of Americana Decor® Chalky Finish paint, waxes and varnishes. To prevent natural tannins, stains, oils, and other unknowns from penetrating and bleeding through the newly-painted surface, we recommend applying one or two basecoats of Americana Decor® Stain Blocker prior to painting for best results.

STEP 2 - **PAINT:**

1. Choose a color. Americana Decor® Chalky Finish paints are available in 29 intermixable designer colors.
2. Choose a brush and apply. Most colors only require one coat for coverage.

Option 1: Americana Decor® Brushes - The high quality synthetic bristles result in a smoother, finished appearance. . . or dampening brush before painting will also deliver a smoother finish.

Option 2: Inexpensive Chip Brush - The natural rough hog bristles result in a more textured/weather-finished appearance.

3. Leave finish as is, or it can be buffed to a satin or glossy sheen.
4. Apply a decorative technique: Many techniques can be applied depending on the desired look (see page 8 for details).
 - [Distressed Finished Technique](#)
 - [Layered Color Technique](#)
 - [Dry Brush Technique](#)

STEP 3 - **FINISH:**

Should I use Crème Waxes or Varnishes?

Use one of the Americana Decor® Chalky Finish Varnishes if the piece is going outside or you want one of the following finishes: Soft-Touch, Ultra-Matte, or Light Satin.

Soft-Touch Varnish delivers a luxuriously soft, yet durable, polyurethane finish. The Light Satin offers just a hint of sheen, and the Ultra-Matte delivers a zero-sheen, no-glare finish.

Tips When Using Varnishes:

- Outdoor Use: Always use a varnish for outdoor pieces. Simply brush two to three coats of desired varnish directly over dry Chalky Finish paint.
- Indoor Use: Use either wax or varnish.

Crème Waxes - Available in Clear, Golden Brown, or Deep Brown. Our water-based waxes are available in three shades and have a creamy consistency unlike other solid waxes on the market. Due to the porous nature of Americana Decor® Chalky Finish paints, our Crème Waxes literally fuse with the paint to provide a super-strong layer of protection against daily use. Waxes offer a greater range of finishing options than varnishes. However, be sure to use an Americana Decor® Varnish for outdoor pieces.

Tips When Using the Crème Waxes:

- Layer tinted waxes over Clear Wax for more control of the color.
- Apply with the waxing brush or a lint-free cloth.
- Buff to a high-gloss sheen or leave it matte.
- To achieve a washed look, Clear Crème Wax can be tinted with a color before applying.

Chalky Finish Techniques

Distressed Finish

Using Water:

Within 15 minutes of applying the color, take a damp cloth and rub over desired areas to expose surface below.

Using Sandpaper:

Using sandpaper: Wait until paint is completely dry. Use heavy-grit sandpaper for a rough finish or light-grit sandpaper for a more subtle distressed look.

Layered Color

Using Paraffin Wax:

Apply the base color. Let dry completely. Apply paraffin wax on desired areas. Apply contrasting color. Let dry completely. Sand areas where wax was applied to remove top layer of color allowing the base color to show through.

Using Petroleum Jelly:

Apply the base color. Let dry completely. Apply jelly on desired areas. Apply contrasting color. Let dry completely. Use a cloth or sandpaper to rub off the top layer of paint where the jelly was applied, allowing the base color to show through.

Dry-Brush

Apply base color. Let dry completely. Load a low quality chip brush with a contrasting paint color. Remove excess paint on a paper towel. Lightly drag brush across surface.

MATERIALS:

Americana Decor® Accessories

- Waxing & Finishing Brush (ADB01)

Americana Decor® Chalky Finish Paint

- Everlasting (ADC01)

Americana® Decor™ Crème Waxes

- Clear (ADM01)

Other supplies

- Water container
- Sandpaper
- 2" flat brush
- Soft cloth or old T-shirt
- Wooden hutch and dresser base

INSTRUCTIONS:

NOTE: Distressing can also be accomplished with a damp cloth before paint is totally dry/cured. For smooth brushstrokes, paint in the direction of the wood grain. Also, better quality brushes result in a smoother finish. Use inexpensive chip bristle brushes if obvious brush strokes and texture are desired. When waxing, light coats will make for an easier buffing process. Let dry completely between painting steps.

1. Use the cloth to wipe down the furniture pieces to remove dust, etc.

2. Use a 2" flat brush and Everlasting to apply one or two coats to both furniture pieces, painting over the hardware as well as the wood.

3. Once dry, distress the paint with sandpaper to allow some of the original wood finish to show through in areas where wear would naturally occur. For example: around handles and on edges.

4. Wipe down the furniture pieces with a soft cloth or use a vacuum cleaner to remove all dust.
5. Using the Waxing & Finishing Brush, apply an even coat of Clear Crème Wax over the entire piece, including the hardware. When dry to the touch, buff the wax to a smooth finish.
